# Exploring Country

What does Country mean to me?

---

---

---

---

## Shell Middens

Shell middens can be found all across the coastal areas of Australia. They are also sometimes found in inland areas around inland lakes and waterways. Shell middens indicate Aboriginal occupation for a significant period of time.

What is the weather like today?

Whose Country are you on today?

How can we care for Country?

## tracking

Tracking is an ancient Aboriginal practice which continues today.

It is an important way in which people can 'read' the landscape. What tracks can you find?

Draw them here and make a guess of what animal they belong to.

# Getting On Country

Find a quiet spot in nature and look around. Draw what you can see. Jot down some ideas about how the different parts of the landscape you see, are inter-connected.
